

# REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 22.

THE REDCLIFF REVIEW

THURSDAY, NOV. 24th, 1932

Number 5

## Red Cross Social Was Most Successful

Hall, Lunch and Prizes Were Donated for Occasion

Cliff Hall presented a very home-like appearance last Monday evening when a number of congenial citizens met for the whist and bridge drive put on under the auspices of the local Red Cross Society. There were eight tables of bridge and nine of whist and there was keen rivalry in both games. The neatly covered tables for both cards and lunch added a tone of home-likeness to the hall and the dainty lunch provided by the ladies made a most fitting close to a most enjoyable evening.

As the hall, the lunch and the prizes were all donated the entire proceeds will go to the local Red Cross fund, and the officers wish us to extend their thanks to all who contributed towards the success of the evening.

The prize winners for the whist were: Ladies Mrs. H. J. Cox; Gents, Mrs. J. Kitchen. For bridge Miss Elsie Frey and Geo. Thomson. The consolation went to Mr. L. Henderson and Mrs. Anderson. The latter was tied with Mrs. G. Cooke and won the tie.

While the event was most successful the Review is of the opinion that the funds could have been considerably augmented if tickets had been secured and sold as many who were unable to attend the drive would have purchased tickets for worthy cause.

## GOOD COAL IRDER

NOW FOR ALBERTA

Another good order for Alberta coal will come to Alberta mines this winter, as a result of contracts let by the Manitoba government for something like 25,000 tons. Of this probably 25,000 tons will be purchased from Alberta mines.

Dreamland theatre, Medicine Hat is again running regularly.

A Christmas Cantata, "Star Led Pilgrims," music based on favorite classics will be presented by the junior choir in the auditorium of Gordon Memorial church on Wednesday, Dec. 21, commencing at 8 o'clock. Admission 25c; children 10c. In aid of the organ fund. Please keep this date in mind.

## Not Impressed With Condition in Russia

Has Failed to Bring a Higher Standard of Living

The capitalist system will do more for working people, despite its failings than the Communism of Soviet Russia," declared A. J. Bone Mining Authority who has just returned from Russia, after spending two years in that country under contract with the Soviets as Metallurgical Consultant, with headquarters in Moscow.

Some features of the Soviet scheme, however, Mr. Bone believed could be copied by western capitalism with success. Features enumerated include planning on a large scale, as exemplified in the five year plan universal medical service, the spread of education and the system of holidays for workers.

The Soviet, he concluded, has failed to bring a higher standard of living. Today the Russian people face, perhaps not famine but a shortage of food as bad as that which existed in 1928.

Mrs. A. Brydie and family left Monday for Cremona, B. C. to join Mr. Brydie, who has taken up land in that district.

## Churches

ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a. m.

ST. AMBROSE'S CHURCH

Rev. Malcolm Stewart, Vicar 9 a. m. Holy Communion. 10 a. m. Sunday school. 1st and 3rd S. m. 2nd, 4th and 5th S. m. 11 a. m. Nativity and Sermon. 7:30 p. m. Evening song and sermon.

GORDON MEMORIAL CHURCH

Pastor: Rev. R. Brakine Pow Sunday, Nov. 27th. 11:15 a. m. Morning Worship Subject: "Life-long Faithfulness."

7:30 p. m. Evening Worship. Subject: "Be Still and Know that I am God."

"As a man thinketh in his heart, so is he and so is his world."

## Bonus Given Farmers For Hiring Jobless

Federal Govt. Pays Farmers And Men \$5 a Month

No Further registrations of single unemployed men from other centers or other provinces are being accepted at Calgary Edmonton and other points where community kitchens are established, according to an announcement made by the Alberta relief commission. All single unemployed in centers other than those in which kitchens are established, will be cared for at their own centers of residence state the commission. Arrangements have been made respecting employment of single unemployed on farms. Farmers may come into the centers and select from those registered under the jurisdiction of the relief commission at the unemployment bureau, and provide a mutual arrangement to be arrived at, the federal government will pay \$5 per month to the farmer and the same to the man employed. The farmer must agree to keep the man until next spring and the man employed must agree to stay till then.

The Calgary Herald's annual road race will be run this year on Monday, Dec. 26th. The distance is 6,147 miles.

Mr. J. M. Tremblay, manager of the local greenhouse, was on a business trip to Regina and other eastern points last week.

The official opening of the local balminton club will take place next Monday evening with a social for which invitations will be issued.

As a result of the heavy sugar beet crop in the irrigated districts of southern Alberta the Raymond factory will produce 50,000,000 pounds of sugar.

The death occurred on October 1st, of William S. Long, an old timer in this district. He leaves a wife and daughter, Anna (Mrs. H. R. Dawson) to mourn his loss.

The creation of four bird sanctuaries in the province recommended at the fish and game convention in Lethbridge last week. Many Island Lake was suggested or one of them.

At the annual convention of the Alberta Fish and Game Association held in Lethbridge last week, Mr. Norman Fraser, of Edmonton, was elected president and Mr. G. M. Spargo, of Edmonton secretary.

Mr. and Mrs. Frank Jerie, Jr. who have been visiting the latter's parents at Rocky Mountain House for the past two weeks returned home Tuesday. Their two daughters who have been going to school there all summer, returned with them.

Mr. A. Hackett, general superintendent of the C. P. R. at Calgary, has been transferred to act in the same capacity at Winnipeg. He will be succeeded here by Mr. W. A. Hackett. The form of the third, five-year contract to be taken by the C. P. R. in 1933 was one of the principal items of business at the meeting.

## Will Call Conference Of Western Premiers

To Discuss Plans for System of Contributory Insurance

Contributory unemployment will be considered at a conference of the Dominion and provincial governments during the approaching parliamentary recess.

This was announced in the House of Commons by Premier R. B. Bennett. In order to have effective machinery for unemployment insurance, it must have the sanction of the Dominion Parliament and the Dominion legislatures.

When the conference is assembled the question of the provinces agreeing to an amendment to the British North American Act vesting entire authority in the matter of unemployment insurance with the Dominion will be discussed.

Premiers of the three prairie provinces have announced their willingness to give Prime Minister Bennett their wholehearted support in helping to make this conference a success.

## BROWNLEE PROMISES TO HELP FARMERS

At a meeting at Wetaskwin last Monday Premier Brownlee stated that if the banks of this country would not take poor risks as well as good ones, and give assistance to the farmers in these days of financial stringency, the government should come to the rescue and guarantee assistance to the farmers, possibly through credit associations.

At this time the Red Cross wishes to acknowledge with thanks the gifts of many fine parcels of clothing. Any woolen pieces or old clothes suitable for making into quilts would be most acceptable just now.

As an encouragement to Alberta seed growers to exhibit at Regina world's grain congress next year, the provincial departments of agriculture have agreed to pay half the entry fee in each class for each exhibitor entering.

The increasing number of accidents on country roads caused by cars running into horse drawn vehicles has forced the police to the conclusion that lights of some kind should be made compulsory on all vehicles while on the highway.

Mrs. J. A. Mollison, better known as Amy Johnson, premier woman flyer, broke her husband's record in a fly from London to Cape Town South Africa. She made the trip of 6,200 miles in four days, six hours and 55 minutes, clipping 10 hours off her husband's previous record.

Seventy delegates, representing 42,000 members of the Alberta Wheat Pool met in Calgary this week. J. Fowler, of Bindas, was representing the Bindas wheat. The form of the third, five-year contract to be taken by the C. P. R. in 1933 was one of the principal items of business at the meeting.

## Teacher Tells of Experiences in Canada

Exchanged notes With Teachers in Medicine Hat

In an old country paper just to hand our attention was drawn to an article in which reference is made to Miss Winifred Wood, of Rockwood, Hexham Old Road, Ryton, who, it says, has just returned from a year's teaching in Medicine Hat where she had exchanged posts with Miss L. Hamilton of that city. Miss Wood was much improved in health and greatly enjoyed the experience. She said she found the Canadian people most hospital and genial, and that house keeping was much easier in Canada and labor-saving devices are much in advance of anything in the old country. Miss Wood also referred to the great advantage of natural gas to this district.

Referring to the glories of horse-back riding Miss Wood tells of assisting to drive a herd of cattle 40 miles to a shipping point.

During the past week Mr. H. Sheehy has disposed of the residence on First St. N. W. previously owned by Mr. Dave Smith, to Mr. Joe Podesta.

Legion members are reminded of the general meeting to be held in the club rooms on Sunday, Dec. 11th, at which the new officers will be elected.

Medicine Hat is already making preparations for the vote elections to be held on Dec. 12th. There will be no majority election but their will be four vacancies on the council.

Another indication of improving conditions is the announcement by Grant Hall vice president of the C. P. R. that 8,000 men will return to work in C. P. R. shops from the Atlantic to the Pacific.

The Dominion Glass plant here has secured another good order for gallon containers for wines. This has meant adding an additional number of men to the staff. The plant is a very busy place these days, for which many are thankful.

The Ladies Aid of Gordon Memorial Church will hold their Xmas sale in the church school room on Wednesday, Nov. 30th from 3 to 6 p. m. when they will offer for sale all kinds of plain and fancy sewing; also articles suitable for Xmas gifts. Afternoon tea will be served.

## Not Much Hope of U. S. Canceling Debt.

Hoover Suggests Other Forms Of Compensation

As a result of the meeting of President Hoover and President-elect Roosevelt, to discuss the war debt question, it now looks as though there is not much chance of U. S. cancelling any of those debts but on the contrary will insist on payments which fall due on Dec. 15th.

Mr. Hoover however proposes legislative creation of an agency to review international financial pledges in connection with world economic and disarmament problems. While declaring flatly against debt cancellation he thought that, "Other forms of tangible compensation than cash" might be arranged.

## ALBERTA MAKES GOOD AT TORONTO FAIR

The spectacular showing of grain, livestock and poultry from Alberta farms at the Royal Winter Fair in Toronto illustrates more clearly than words can portray the agricultural versatility of this province. The Royal fair is an event that attracts exhibitors from all over Canada. Competition is exceptionally keen. Only the real totem exhibit wins prizes there and Alberta won a goodly share in all the above lines.

It often happens when people go to the polls to vote on election day that they are disappointed to find their name is not on the voters' list and consequently they can't vote. As there will be no majority election but their will be four vacancies on the council.

The annual canvass on behalf of the Bible Society will begin on Monday, Nov. 28th. The officers if those at branch hope the canvassers will meet with a syncretism and ready response. Any information will be readily given by Mrs. James Stratton of Mrs. F. Cann.

The ladies of St. Mary's Altar Society are holding a sale of home cooking and fancy work in the I. O. O. F. hall on Friday afternoon, Nov. 25th from 2 to 5:30 o'clock. Tea will be served during the afternoon. There will be a splendid assortment of articles for sale. Everybody invited.

How is Your Stomach?

## WHIST DRIVE AND Masquerade Ball in I. O. O. F. Hall Friday Evening, Nov. 25th

Under the Auspices of St. Mary's Altar Society

GOOD PRIZES

For Ladies' and Gent's Character and Comic Costumes

Start Now and Get Your Costume Ready

Tickets 50c Per Couple. Extra Ladies 25c Each

LUNCH SERVED AT MIDNIGHT

## Use our money orders

WHEN you pay a small bill use the Bank's Money Order. This method is safe and economical.

Tellers at any branch of the bank will gladly sell you Money Orders.

## Vancouver Grain Shipments

Bringing Back Commerce That Has Been Going To U.S.

Vancouver is winning her grain triumphs, not at the expense of other Canadian ports but in bringing back to "tailored" channels commerce that has been allowed to go to the United States.

As much as 67 per cent. of the Canadian wheat crop was once handled by the United States. It is pointed out by Robert McKee, president of the Vancouver Merchants exchange, in his presidential survey of foreign trade distributed to members.

But last year only 10 per cent. of Canada's wheat harvest, "as Vancouver's exports increased," went through the United States.

"The growth of the western route has not been at the expense of other Canadian ports, their percentage of the wheat movement having remained fairly constant during the past ten years at about 33 per cent. and during the crop year just closed they handled an even higher percentage, 37 per cent.," said Mr. McKee.

"The grain being shipped through Vancouver has been diverted from United States Atlantic coast ports."

Of wheat alone in the crop year ended July 31, 1932, Vancouver handled 44 per cent. or 700,000,000 bushels of Canada's exports. Eastern Canada ports handled 37 per cent. or 64,000,000, and the United States 33,000,000 or 10 per cent., compared with 67 per cent. in 1921.

The outlook for the present year Mr. McKee considers very favorable, with a good possibility of increased volume of shipments. The 1932-33 big crop in Alberta, whence comes most of the flow to the Pacific coast. The prospects of continued improvement in the flour trade with China, where Canada has built a large business in the past ten years, are also satisfactory.

He points to these three main export factors:

- (1) Better competition by Australia, whose exchange position is more favorable.
  - (2) Large quantities of flour sold to China by the United States farm board on credit for food relief purposes, but which have largely gone on the open market.
  - (3) The small percentage of low-grade wheat in the Canadian crop in the past two years. (China hitherto purchased only a low-grade crop.)
- However, says Mr. McKee, Canada wheat is doing better in terms of value than it was last season.
- In the first six months of 1932 flour exports to China have amounted to \$2,441,000. In the same period of 1931 they were \$1,058,325, compared with the record year of 1929, when they were \$2,600,494.

## On the Shores Of Galilee

Historic Stone On Which Christ Had Believed To Have Been Crucified

The Boulder upon which Christ stood on the shores of the Sea of Galilee to perform the miracle of the loaves and fishes is believed to have been discovered at Tiberias, near Tiberias, Palestine. The stone was found in the centre of a fourteenth-century church, recently uncovered, and is presumed to have been beneath the altar.

"The church was one of the many built during the reign of Constantine the Great. Behind the stone was found a mosaic panel, depicting in vivid red, red and yellow, a basket, several loaves and two fishes.

In the western half of the church a mosaic floor was uncovered, and about 15 feet long and 21 feet across. It contains a design of storks and other birds, and is said to be the preserved mosaic floor ever found in the Holy Land. Although buried beneath dust and rubble for about 1,600 years, the mosaic shows no signs of erosion.

## Man With Two Hearts

Edward Reynolds, 52, of Pittsburg, possesses two hearts. The discovery came through a swimming accident when Reynolds was 30 years old. A doctor, noting a broken arm, was surprised to find his heart on the right side. Later an X-ray showed he had another heart, although much smaller, on the left side.

A dentist admitted that he will accept his patient. This is called reciprocity; you fill my cavity and I'll fill yours.

The coldest town on the British Isles is Banarum, which has an average yearly temperature of 11.2 degrees above zero.

W. N. H. 1938

## Planning Further Use For London Mansion

St. Dunstan's May Become International Hostel For Children

St. Dunstan's, the famous London mansion, which has been empty for four years since it ceased to be the headquarters of the movement for training war-blinded soldiers, may be converted into an international hostel for children. If the scheme matures, children from all over the United Kingdom, the empire and Europe will gather at St. Dunstan's for a stay of a week or two to study and visit places and things of interest in London, and Eugene's park may become the children's "children's park" in Europe.

The School Yards Association, a voluntary body of 4,000 teachers, whose vice-president is Lord Burgham, and who arrange in their spare time educational holidays for more than 50,000 school children a year, is sponsoring the equipment of the mansion. A third of the sum required to convert the building into a hostel has already been subscribed, and by the teachers of the United Kingdom themselves, and as soon as the necessary fund can be completed the work will be begun.

An official says it is intended to accommodate 120 children a night, and to have as a feature a good library of guide books, maps and charts. The office of works is doing best to forward the scheme, and the treasury has fixed a purely nominal rent of \$500 for the mansion.

St. Dunstan's was built by permission of Queen Victoria on crown property in Regent's Park. It was known as St. John's Lodge, and was a hotel for Lord Dunsley. It was converted into a military hospital in 1914, and at the close of the war became the headquarters of Arthur Pearson's organization for training blinded soldiers.

## Marler Says Canada Experienced Nation

Youth Over-Emphasized Declines Canadian Minister To Japan

"Canada is often spoken of as a young country; in my opinion our youth is over-emphasized," Hon. H. Marler, Canadian Minister to Japan, said in an address at the University of British Columbia, where the honorary degree of LL.D. was conferred on him.

"We are not really a young country, so we are waiting in experience," he said. "Here we are not out of touch with the problems of the world or self-government. We have not welded together an Empire stretching from Atlantic to Pacific."

"Here we are not, however, fit to place among the trading nations of the world."

"We nations that are called 'old' are not as young as we are. If we ponder over this we should realize we are not young, but an experienced nation, quite capable of conducting our own affairs in foreign lands."

Mr. Marler made these remarks in an appeal to Canadians to be awake to their responsibilities for foreign trade and its necessity to the life of the nation.

## A Good Bird Story

Large Bird Caught In Tree Spread

On Sunday, one day last winter, while a gang of workmen were laying a pavement near Tiberias, they spread a section of the road with liberal quantities of tar as an adhesive.

While the crew was working at another point, a large flock of migrating birds swooped down, settled on the fresh roadway and got stuck in the tar, making the road look like a gigantic strip of taffy. The local stags game warden was called, and aided by the workmen, he succeeded in extricating approximately 500 birds. Many had accumulated so much tar in their struggles that they were unable to fly, even after being liberated.

## One Fecundity

History was the subject of the morning's lesson at the boys' school. "Tommy White," said teacher, "tell the class what you know of the fecundity of the sea." The boy got falling to his feet, but not a word came from his lips.

"How does this way of speaking differ from yours and mine?" the teacher put to Tommy.

"Well, sir," said Tommy, "they don't swear."

The world's population in 1927 was estimated at 1,946,000,000 by the League of Nations.

War gas masks are being sold in Koenigsberg, Germany, at 25 cents each.

## GREETING A "FORGOTTEN MAN"

Governor Franklin D. Roosevelt is shown as he talked with a mine worker as he passed through West Virginia coal district en route to Wheeling where he delivered a campaign speech. The Democratic candidate discussed the labor situation with the miner, who answered in broken English that he worked six days for 45 cents.

Governor Franklin D. Roosevelt is shown as he talked with a mine worker as he passed through West Virginia coal district en route to Wheeling where he delivered a campaign speech. The Democratic candidate discussed the labor situation with the miner, who answered in broken English that he worked six days for 45 cents.

## Punishment Was Just

Woman Fined For Mailing Letter Hearing Excessively Used Stamp

That ironic form of punishment known as poetic justice was so completely visited upon a British woman of late that all the world should have about it. The woman, described by the London Morning Post as well-to-do, handed into a post office a letter bearing a three-halfpenny stamp which had been previously used.

For doing this she brought before the magistrate fined 25s and ordered to pay costs to the amount of 57.7s. Evidence produced before the magistrate was that the letter was to a betting commissioner, placing bets on horses which won and which would have yielded a profit of more than £25. The letter was not delivered; the bets were not placed; the profit was not made. All for lack of a three-halfpenny stamp.

## Farming Is a Business

And Should Be Organized On a Business Basis

Here is what Dr. J. C. Cole, Assistant Director of Agricultural Economics, Ottawa, has to say about the farmer in national economic writing in the current issue of the Economic Annals:

"The modern farmer is an entrepreneur—an owner and organizer of a business in which he and members of his family perform a good deal of the manual work connected with the enterprise. He buys and sells commodities. He employs labour and capital. He seeks an income which will enable a satisfactory standard of living. It may be well, therefore, for all those interested in agriculture to bear in mind that farming will be a better way of getting a living when it is organized on a business basis."

## Police Irony

It was a long play, and was being shown at the village hall. The curtain was rung up on the fourth act, disclosing a actor sitting wearily at a table. All was stillness; he had not spoken. At last a member of the audience ventured to express the sentiments of the house.

"I hope we are not keeping you up, sir," he suggested kindly.

Landlord: "No Mr. Newboard has found something fresh to complain about this morning."

Guest: "No, mum, it's the eggs."

When he makes a leap, and starts to run in coltish gait, Kicking his heels: "Pur-doon't he, though old, still carry all his bones in natural relation!" While over on the old scrap heap All unsummoned lie, in ignominious parts And deep humiliation, Automobiles.

—Margaret G. Clark.

## FANCIFUL FABLES

LAY OFF LADY! QUIT CRASHIN' IN ON MY RACKET!

Candidate—I suppose in this campaign the proper thing for me to do is to stand on my record.

Political Boss—No; to jump on the other fellow's.

Victim—I am exceedingly pleased to see such a dense crowd gathered here tonight.

Voice—Don't be too pleased. We ain't all dense.

"Let me see," said the smart guy, "was it you or your brother who used to be one of my admirers?"

"Probably my father," replied the once-rejected adulter.

Boy: "I want some rope like this." Shopkeeper: "How much?" "Why, enough to reach from the goat to the fence."

## Gave Him No Thrill

Aviator Describes Attack On Works At Alderbrook How He Fought

Men who accomplish great things generally belittle their achievements, or at least refrain from showing any of the excitement that more bystanders show. Captain Cyril Uwins, is no exception to the rule. The Captain is so used to describing his sensations while flying in the stratosphere more than eight and half miles above the earth at Bristol, England, recently and replied with two words, "boreally boring." Captain Uwins' feat was his attack on the world's altitude record in a Vickers "Venge" airplane fitted with a British "Pegasus" engine and, despite the coils with which Captain Uwins regarded the entire proceeding, the flight was one of the most dramatic because the elaborate preparations, occupying many months, had been kept a closely guarded secret. It was only when the officials of the Royal Aero Club were hastily summoned from London to Bristol to observe the flight that the fact became generally known.

Captain Uwins climbed for about two hours in the "Venge." The whole time he was fed with oxygen and his clothes and even his goggles were electrically heated. At 45,000 feet, the height recorded by the instruments, no man could have lived for a moment without these appliances for the thermometer registered more than 100 degrees of frost and the air was so thin that death from oxygen want would have followed if the artificial oxygen had failed.

Uwins, who was less excited about his achievement than anyone else, stated he had descended that he, having been on climbing and believed that the airplane could have gone higher except that the petrol supply was consumed to an end. Before this flight, on two or three occasions he had flown at more than 40,000 feet to test the machine and engine.

Uwins exceeded by an adequate margin the world's altitude record; the highest official confirmation of the new record is possible the scale barographs carried on the flight have to be inspected and tested by the National Physical Laboratory and their readings have then to be corrected for atmospheric pressure and density.

—St. Thomas Times-Journal.

## "Hope Springs Eternal"

Indispensable To Humanity, But Often It Is The Author Of Tragedy

One of the strangest quirks of human nature is the hope which "springs eternal" in the human breast. It is the mysterious little thing which sends the soldier into every quagmire of the fray, confident that he will come out alive and unscathed. It is the ineffable something which permits man to live happily unmindful of the inevitable death. It is the optimistic, omnipresent companion of man through the vicissitudes of life. Without it life would be unbearable to the multitudes.

But while hope is indispensable to humanity it is not infrequently because the author of tragedies. After suffering a full fall of happiness hope sometimes harvests a bumper crop of sorrow and misfortune. "There is no advantage that man cannot live on hope alone." Those who try it usually suffer only disillusionment or starvation. Hope is responsible for a great deal of human improvidence.

Some of those who overlook hope are the workmen who, hopeful of continuous employment and high wages, preserve none of his earnings; the husband and father, who, hopeful of living at an independent old age, fails to give his family and himself the protection of life insurance; the property owner who, hopeful of never having a fire, places no fire insurance on his property; and the man who, hopeful of permanent good health, neglects to preserve his health.

—B. C. Characterist Standard.

Candidate—I suppose in this campaign the proper thing for me to do is to stand on my record.

Political Boss—No; to jump on the other fellow's.

Victim—I am exceedingly pleased to see such a dense crowd gathered here tonight.

Voice—Don't be too pleased. We ain't all dense.

"Let me see," said the smart guy, "was it you or your brother who used to be one of my admirers?"

"Probably my father," replied the once-rejected adulter.

Boy: "I want some rope like this." Shopkeeper: "How much?" "Why, enough to reach from the goat to the fence."

## Machine Not Infallible

Inventor Of "Lie Detector" Admits It Sometimes errs

Dr. John A. Larson, the "only Ph.D. cop in the world," has written a book in which he admits that the lie detector of his invention is fallible. No man should be sent to jail nor should any suspect be released from custody on the evidence of the lie detector, according to Dr. Larson, who is an assistant state criminologist.

The machine, he wrote, is inaccurate in so far as the human interpretations of its records may be faulty. The percentage of error is from 10 to 20 per cent.

Dr. Larson invented the lie detector while serving as a policeman under Chief August Volmer in Berkeley, California, in 1921. It consists of a cuff which is placed about the upper arm to register blood pressure, and of a tube about the chest to measure respiration.

The blood pressure and respiration of the subject on questioning are recorded on a cylinder of paper driven by a synchronized motor. The variation at the time the subject answers any questions determines whether he is telling the truth.

Dr. Larson, who has used his device countless times in questioning criminals cases, said its greatest value lies in protection of the innocent. The merit of the machine, in his opinion, is that it "gets at the truth" without "third degree" methods.

In eleven years the criminologist on the loyalty of eleven years of persons who had written only seven per cent. These cases were of mental defects, psychopaths, and drug addicts. Dr. Larson has used the machine in cases where he has been asked to take the test on advice of counsel and later were found guilty.

Dr. Larson wrote: "The lie detector does not get false confessions because there is no pain and nothing to inspire fear, but it does cause a person to feel a sense of a nervous woman and she will confess to anything. Her a weakling in the stomach with a belly after every question, and the same result will be gained."

Dr. Larson's book, just released by the National Physical Laboratory, is entitled: "Lying and Its Detection."

## Centre Of Lloyd's Business

Whole Fabric Of Firm Revolves Around The Room

Philip Dignity writing in the Fort Nightly Review, says: "The main business of Lloyd's—which is underwriting insurance risks—is carried on in the Room. Around the Room is conducted and revolves the whole fabric of Lloyd's. In practice, as in spirit, the Room is the centre of the business."

Attention to the Room is granted only to those who, in one way or another, subscribe to Lloyd's. No stranger may enter the lounge gains that he has from the world outside, unless accompanied by one who has the entire in this respect Lloyd's is a room of its own. Lloyd's is a change, into which no stranger may ever penetrate.

Over all the Room hangs the famous motto: "There is no institution that is as well known as Lloyd's. It is in the room when there is news of importance to be communicated to the underwriters who work beneath it, as it hangs on the Bosphorus, above the callers' heads. It is in the room when royalty or other distinguished visitors appear in Lloyd's. When a ship is lost, the bell is tolled."

## Chickens Travel By Plane

Seventy Hens Taken By Aeroplane To The Far North

There are poor air travellers, W. A. Spence, aviator from the Guelph, Lake district, started on arriving in Winnipeg by aeroplane from the north. He carried to him to the Island Lake Catholic mission some time ago, giving children of that locality their first view of tame chickens. The birds were fed on some cases of air sickness, and their eggs are selling for a dollar a dozen.

Dr. Spence was predicted by Mr. Spence, because cold weather set in two weeks earlier than usual in the north.

"Does the foreman know the trench has fallen in?" asked the master of works.

"Well, sir," replied the navy, "we are digging him out to tell him."

Arch laborer under the supervision of British consular recently moved \$250,000,000 from the Palestine treasury to Barclay's Bank, Jerusalem.

## **WORLD HAPPENINGS BRIEFLY TOLD**

Actual operations on the establishment of the trans-Canada chain of airfields began on November 1.

Over 50 French language weeklies in the province of Quebec have joined in formation of the "French Weekly Newspaper Association of Canada."

Over sixty per cent. of the creamery butter produced in Canada comes from two provinces, Ontario and Quebec.

Premier Benoit Mussolini appeared to the United States to cancel or reduce the European war debt in an open air address at Turin, Italy.

Practicing barrister and resident of Winnipeg, Man., for half a century, Henry Macdon, 76, is dead. Born in Weston, Ont., he came to Winnipeg in 1882.

Forty-seven persons were killed when a floor collapsed in a house near Cairo in upper Egypt while a wedding ceremony was in progress. The bride was one of the victims.

The Alberta Government and the Dominion Administration will be asked to render assistance in a scheme to provide flood control on the Bow River at Calgary.

A plague breaking the names of 13 French soldiers who lost their lives during the siege of Ypres in 1915 years ago, has been unveiled in Paris, France.

The Dowager Marchioness of Lansdown, widow of the fifth Marquis of Lansdowne who was Governor-General of Canada from 1883 to 1888, died recently in London, England.

Judge Holmes Gregory was appointed common sergeant of the City of London in succession to Sir Henry Fiddling Dickens, sixth son of Charles Dickens.

The decision whether all Canadian wheat shipped to United Kingdom ports shall enjoy the same commercial preference or only that going direct from Canadian ports is a matter for the British Government, Hon. H. H. Stevens, Minister of Trade and Commerce, said.

## **YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS**

Wake up your Liver. No Calomel needed. When you feel tired, depressed, sore on the inside, that's your liver. You're not getting only two pounds of liquid bile from your liver. You're getting only two pounds of liquid bile from your liver. You're getting only two pounds of liquid bile from your liver.

When you feel tired, depressed, sore on the inside, that's your liver. You're not getting only two pounds of liquid bile from your liver. You're getting only two pounds of liquid bile from your liver. You're getting only two pounds of liquid bile from your liver.

When you feel tired, depressed, sore on the inside, that's your liver. You're not getting only two pounds of liquid bile from your liver. You're getting only two pounds of liquid bile from your liver. You're getting only two pounds of liquid bile from your liver.

## **Sounds Like Magic**

Press Buttons in High-speed Restaurant and Food Appears

"No waiting" is the slogan of a restaurant just opened in France. Diners don't wait for the waiters, for there aren't any waiters to keep them waiting. As he walks through the hall of the restaurant the customer chooses his meal from gigantic menu boards hanging on the walls. Arrived at the office, he gives his order and receives a ticket with a number upon it. He then goes to the seat bearing that number.

Down the middle of the table runs a broad travelling band, and barely has he taken his place when his first course comes bobbing along. He removes it from the band, disposes of it, and then places the empty plates and dishes upon another band beneath the table, which moves in the opposite direction. Meantime he presses a button and in a matter of seconds the next course appears. The third plate and dishes are carried by their band to the waiting-up department, whence yet another band takes them back to the kitchen. The price of a three-course meal is about twenty-five cents, and so well is the restaurant paying that its owner is talking of supplying another course for the same money.

## **Deserves The Honor**

Earl Byng Earned Award of Field Marshal's Baton

General Byng had a remarkably good record as a commander in the great war and richly deserves the field marshal's baton that has been awarded to him. The Canadian expeditionary force served under General Byng, who, after the war, became governor-general of this Dominion.

When a British soldier is given the baton, he reaches the highest rank in the army, that of field marshal. The baton is a short staff presented by the King as a symbol of office. No one is made a field marshal unless he is of royal blood or has rendered distinguished service.

## **The Loneliest Island**

Conard Lines "Caribinia" To Visit Tristan De Cunha Next Year

Weather permitting, Tristan De Cunha, loneliest island in the inhabited world, will be visited by the Conard Lines Cruise liner "Caribinia" while on her journey around the world, via the southern hemisphere, early next year.

A large quantity of food supplies will be sent ashore for the lonely islanders, and the captain of the "Caribinia" will offer a banquet to the islanders in the dining saloon of the ship.

When a ship called two years ago at the island, the natives said they still had plenty of canned salmon, eggs, and butter. They requested provisions for rats, their pest because of the rats.

Although the inhabitants frequently become depressed over the scarcity of food and long absences of ships, they always expect to leave the island when offered land elsewhere. They are often without mail and newspapers for a long time and their food supplies are often insufficient because of the soil and the sea give them poor support.

## **FAT MAN Loses 63 lbs.**

Kruschen and Walking

Overweight man who was to lose 63 pounds in 100 days. The benefit of this man's experience. He gives them to eat.

"I had a little over twelve months I have reduced my weight from 237 lbs. to 174 lbs. by taking a dose of Kruschen Salts every morning for six months. I did not resort to any form of dieting."—G. L. H.

You can take off fat with Kruschen Salts if you take one-half hour before breakfast, modify your diet, and exercise regularly.

While you are losing fat you will be gaining in energy—in endurance—in ambition. The old arm chair won't hold you any more—you'll want to be up and doing—you'll enjoy work and active recreation and you'll sleep like a top. You'll lose fat, and probably five years longer.

## **Canadian Wheat Exports**

Volume Is Much Greater This Year Than Previous Season

For the first 11 weeks of the current crop year, exports of Canadian wheat totalled 3,560,000 bushels compared with 2,943,300 bushels for the same period of last year, according to a report issued by the Dominion bureau of statistics. For the week ending October 13, the total was 486,786. This is a decline from the previous week of nearly 1,000,000 bushels.

The following table shows the quantities exported and their change of exportation in the first 11 weeks:

1932 1931  
Montreal, 24,881,813 13,774,077

## New Use For Mineral

Anhydrite May Soon Become a Valuable Asset To Canada

Anhydrite, a mineral which is a natural relative of gypsum, found extensively in some parts of Canada, may soon become a much more valuable asset than it has hitherto been regarded. For some time scientists of the Canadian Government Department of Mines have been making intensive experiments with anhydrite, with encouraging results. The research work has been directed largely towards ascertaining how to use anhydrite in the manufacture of commercial plasters, and now plasters from this mineral have been produced, which, it is disclosed following a series of exacting tests, compare favourably both in setting qualities, tensile strength and other factors with the better grades of gypsum plasters; in fact, the experiments so far made show the anhydrite plasters have greater density than those of gypsum, that they are easily worked, are strong and do not require calcination. So it comes about that the scientists have discovered that an incidental mineral regarded with disfavour by gypsum operators largely because of the expense involved in sorting it from the gypsum, on which it sets as an adulterant, promises to prove a decided asset.

## Fast English Train

Beats Own Record

Cheltenham Flyer Clips Four Minutes Off Fastest Run

Said the mogul of the Great Western Railway to Tim Lewis, driver of the Cheltenham Flyer, world's fastest train:

"Here take this buggy out and shove two minutes off the Swindon-Paddington run."

"Tim winked at his freeman, eased out the throttle and away they went. Bumping happened. Sixty-one minutes later they skidded into Paddington, having lowered the scheduled time not by two minutes but by four."

"Had a tough break," apologized Tim. "We lost two minutes at Didcot. Rapid—had to go slow."

The mogul smiled into their well-lathered sleeves. What Tim meant they knew was that he eased the Flyer down to around 75 miles an hour in order to play safe.

It was over the same stretch of line last June that the Cheltenham Flyer set up her world's record. At that time she did the 77½ miles at an average of 81.6 miles per hour, touching 92 at maximum speed.

Tim's average was 76 and his best 87. Let the whole truth be known, however: Tim was hauling eight coaches and 265 tons; the load last June was six coaches and 195 tons. You don't have to be a railroad man to get the difference.

## Tropical Fruit By Air

Mangoes Reach London From Egypt In Sixty Hours

For the first time mangoes, the much-prized tropical fruit, are now sold in England in a fresh condition.

Gathered in Egypt late on Saturday evening, they are placed on board the Imperial Airways flying-boat leaving Alexandria for London with the Indian and African air-mail early on Sunday morning.

The mangoes arrive at Croydon on Tuesday afternoon, within approximately sixty hours of leaving Egypt, and are conveyed immediately by motor-car to the west end, being on sale the same evening.

Usually ripened rapidly, and, hitherto, owing to the time occupied by surface transport, the problem has been to get them to London before they have become over-ripe.—Public Opinion.

## Travellers' Taste In Fiction Has Changed

Murder and Mystery Stories Are Most In Demand

"When people go travelling nowadays they want murder and mystery stories instead of love stories to help them while away the time according to Martin Harb, proprietor of a book store in a railway station at Detroit.

"I used to sell a lot of stories about the romantic pretty girls and falling in love, but that was two or three years ago," he said. "Now they want two or three murders in their books, off the western to the rock is next in popularity."

The books on astrology, so popular a few years back, are seldom asked for, according to Harb. Likewise, there is little demand for the souvenirs bought avidly a few years ago.

## Britain's Oldest Woman

Never Could Be Persuaded To Discontinue Her Age

Mrs. Arabella Bridgman who has just died at The Laurels, Clewer, Windsor, at the age of 106, was believed to be the oldest woman in Britain—but she never admitted it.

She refused to put her age on any document—even the census paper—and she would not fill up income tax forms.

She died lived at The Laurels for more than 60 years, but she always refused to have gas or electricity in the house, which was lit by candles.

## Preferred Payments

The Aberdonian pulled a brother Scot from the water just before he went down for the third time. "I'll remember ye in me will for tale," exclaimed the rescuer one. "But, mon," said the other, "would ye no prefer to cut me off w' a shilling now?"

London historians have found that the city's first library was housed in a Croydon Monastery which was burned down nearly 3,000 years ago.

Large deposits of copper have been discovered in Bashkir Republic in the Soviet Union.

Chile is urging price fixing on a number of products.

## MORPHINE

Red system of poisonous acids, due to excessive eating, drinking, smoking, with 3 talsophenols of Phillips' Milk of Magnesia

Est, drink, and be merry! No need to feel "lunk" next day. Take a laxative dose of Phillips' Milk of Magnesia when you go to bed, or with your breakfast orange. It risks stomach and bowels of all lingering poisons. No headaches. No nausea. Not even a coated tongue. Get the genuine Phillips' Milk of Magnesia; substitutes are not the same.

Made in Canada

## Virgin Rock Seldom Seen

Phenomenon On Nova Scotia Coast

Usually Obscured by Fog

The coastline of Nova Scotia is well known for its rugged splendor. Twisting and turning in almost endless variety, it provides quiet bays and coves, as well as points where

surgant seas rage furiously against impregnable rock. Down through the centuries one of the coastal attractions has existed near this village.

A mile from Prospect, out on Burnt Island, where the breakers extend their greatest force, lies the Virgin Rock, so named because of its remarkable resemblance to the Virgin and Child. Ages of erosion have forced the great rock into the shape of a woman's head and shoulders and the head and shoulders of a child.

Occasional when the phenomenon may be seen are rare, due to weather conditions, and comparatively few persons, including residents of Prospect, have had a good view of the Virgin Rock. With a heavy sea running, an approach to the rock is impossible, and when the water is smooth, fog is likely to obscure the view.

Locate Submarine Mountain In Pacific

More Than One Mile High Opinion Of Surveyors

A huge submarine mountain, more than a mile high, has been discovered in the ocean 50 miles west of Santa Cruz, California, by the crew of the geodetic survey boat "Guide," which has been making soundings near here.

A huge crater, 7,000 feet deep, was located some time ago. The top of the mountain is approximately 100 feet above sea level, or 5,000 feet, under the surface.

Edible bird nests are being gathered in Java and the Philippines for export to China.

The average weight of an elephant is about five tons.

## Little Helps For This Week

"Now the God of patience and consolation grant you to be like-minded one toward another, according to Christ Jesus."—Romans xv. 5.

"Let patience have her perfect work."—James i. 4.

Make me patient, kind, and gentle Day by day. Teach me how to live more nearly As I pray.

—Barbara's Magazine.

The exercise of patience involves a continual practice of the presence of God; for we may be come upon at any moment for an almost heroic display of good temper; and it is a short run to unattractiveness, for nothing is left to self. All that seems to be most intimate, to be self's private property, such as time, home, and rest, are invaded by these continual trials of patience. The family is full of such opportunities.—F. W. Faber.

Perian Balm is magical in creating aluring complexions. A little gentle rubbing and your skin is invigorated and touched with the true beauty of youth. Charmingly fragrant. De-lightful to use. Cools and soothes the skin. Relieves all roughness and chafing caused by weather conditions. Tones and stimulates. Enhances and protects the loveliest complexion. Unrivalled as a perfect aid to beauty and charm.

English Language Used

All signs on Japanese ships are in English—even the signs on the bridge which is never occupied by anybody but Japanese. The men are printed in English only. No Japanese is even on ships which never run on English-speaking ports.

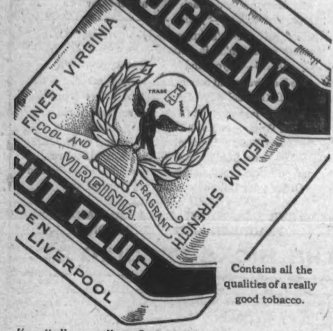

"Animals do not know what it is to be superstitious," declares a clergyman. But we have yet to hear of the mouse that will pass a white cat on the stairs on a Friday.

One of the most beautiful sights in the Hawaiian Islands is the moonlight rainbow.

If you "tell your eye, an Ogdens' fine cut and Chantier cigarette paper."

## The Wizard Of Room 40

Mr Alfred Dering Invaluable To British Admiralty During War

Mr Alfred Dering who has been presiding over the meetings of the British Association at York, is an example of a man who is destined all his life to be pursued by the record of one brilliant achievement which gives little indication of the value of his contributions to science.

The Royal Society of Arts gave him the Albert Medal for his work in magnetism and his services to technical education, and when he was made a Doctor of Science they spoke of him as a pioneer in the measurement of earthquakes and the detection of sounds at sea. He has been professor of engineering at Tokyo, Dundee and Cambridge, Director of Naval Education, and Principal of Edinburgh University.

But the work for which he is most famous was that of deciphering intercepted wireless messages from the enemy during the war in Room 40 at the Admiralty.

Though Mr Dering did not start the Admiralty knew the day before the Battle of Jutland that the German ships were coming out, also the hour and whether they were bound.

The Battle of Jutland was brought about through the decoding of wireless orders and deciphering and submarines "talked" without suspecting that Room 40 understood their codes.

Even when the Germans fell to changing the key to the principal naval sign book every night at midnight, Room 40 was not seriously embarrassed. It also deciphered the famous message in which Germany offered to combine with Mexico against the United States. He says that his experience in "Room 40" brought him in contact with so many ciphers that he has never solved a cross word puzzle since.

SITUATION VACANT—FEMALE

LADIES WANTED TO DO LIGHT sewing at home; good pay; work sent charges paid. National Manufacturing Co., Dept. 84, Montreal.

MEN—WOMEN—WANTED

Wonderful opportunity. Ambitious beginners wanted. No experience necessary. Electrical, Auto-Mechanics, Chauffeurs, Writers, Radio, etc. etc. etc. Write—Modern Dated Systems, 303 Alexander Ave., Winnipeg, B. C. or Calgary, Edmonton, Regina, Saskatoon, Vancouver.

Time Not Valuable

"Young man," said the city merchant severely, "I notice that you are almost invariably late in ten to twenty minutes late in getting to the office."

"I know, sir," replied the youth, "but you tell me to get such a small value as my time that I don't think it mattered much," answered the young man.

One wonders if perhaps German engineers and French scientists would be helped on a bit if "Deutschland Uber Alles" and "La Marseillaise" were replaced with songs breathing the less nationalistic and not quite so much martial air.

In the last 25 years the use of electrical energy has increased from about 11 billion to more than 48 billion kilowatt hours.

Don't—Please get out the balance sheet as soon as possible.

Now Bookkeeper—Yes, sir; do you want it in favor, or not?

Flying fish can fly a quarter of a mile without touching the water.

W. N. U. 1996

ACHES and Pains easily relieved

Aspirin will relieve your suffering in a matter of minutes. It is a little white tablet in a little white water. The pain is gone.

It is as easy as that to be rid of the pain from an aching tooth; of headache; of any common rheumatic aches due to rheumatism, lumbago; of colds and flu; any case of rheumatism. These unexplained pains of women are nothing away in an instant.

The modern way to relieve pain is with Aspirin. That is the way that modern medical men approve. They know Aspirin is safe—can do no harm. It does not depress the heart. You will always find Aspirin in any drugstore, and if you read the proven directions and follow them you will always get relief. You will avoid the risk of suffering if you just remember about Aspirin tablets. Be sure you get Aspirin and not a substitute. "Aspirin" is a trade-mark registered in Canada.

## DOMINION OF CANADA

### 4% LOAN—1932

The Minister of Finance offers for public subscription

\$80,000,000

### Dominion of Canada 4% Bonds

Bearing interest from 15th October, 1932, and offered in two maturities, as follows:

\$25,000,000—3 YEAR 4% BONDS, DUE 15th OCTOBER, 1935

\$55,000,000—20 YEAR 4% BONDS, DUE 15th OCTOBER, 1952

Subject to redemption at par and interest on or after 15th October, 1947

Principal payable without charge, in lawful money of Canada, at the office of the Minister of Finance and  
Receiver General of Canada at Ottawa or at the office of the Assistant Receiver General at Halifax, Saint  
John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

Interest payable half-yearly, 15th April and 15th October, in lawful money  
of Canada, without charge, at any branch in Canada of any Chartered Bank.

#### Denominations:

3 YEAR BONDS, \$1,000

20 YEAR BONDS, \$500 AND \$1,000

The proceeds of this Loan will be used to retire \$34,449,950 of bonds maturing 1st Novem-  
ber, 1932, and to provide for the general purposes of the Government and the Canadian  
National Railways.

The Loan is authorized under Act of the Parliament of Canada, and both principal and  
interest are a charge on the Consolidated Revenue Fund of Canada.

The amount of this issue is \$80,000,000. The Minister of Finance, however, reserves the  
right to allot or reject the whole or any part of subscriptions received, provided such allo-  
cations do not increase the principal amount of the issue by more than \$25,000,000.

Applications will not be valid on forms other than those printed by the King's Printer.

ISSUE PRICE: 3 Year Bonds, 99.20 and interest, yielding to maturity 4.28%  
20 Year Bonds, 93.45 and interest, yielding to maturity 4.50%

Payment to be made in full at time of application or in the case of the 3-year bonds, in installments.

Subscription lists will open on 31st October, 1932, and will close on or before 16th November, 1932,  
with or without notice, at the discretion of the Minister of Finance. Subscriptions will be received by  
any branch in Canada of any chartered bank and by recognized dealers from whom official application  
forms may be obtained.

DEPARTMENT OF FINANCE,  
OTTAWA, 31st October, 1932
